- Minimal Tiptap Editor

22/06/2024 :

- shadcn-tag-input was renamed emblor

12/05/2024 :

- sortable
- Planner

07/05/2024 :

- langui

29/04/2024 :

- shadcn-cal-com
- Multi select component
- Shadcn country region select

24/04/2024 :

- shadcn-phone-input
- @react-querybuilder/shadcn-ui

7/04/2024 :

- Flutter shadcn/ui

26/02/2024 :

- shadcnui-expansions
- Fancy Multi Select
- Fancy Box

- Fancy Area

25/02/2024 :

- shadcn-keyboard-shortcuts
- image-upload

...

shadcn/ui has become very popular due to its ease of use, clean ui and code.

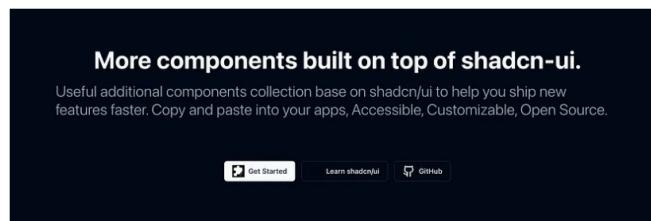

I often need some extra components / libraries that are ready to use in a shadcn/ui project, and with time I gathered some great resources.

So here is a list of these components you may want to use in your projects !

If you find other useful resources, leave a comment below, and I'll add them to the list.

...

shadcnui-expansions

A set of extra components built on top of shadcn/ui :

- [Autosize Textarea](#)
- [Blockquote](#)
- [Floating Label](#)
- [Input](#)
- [Heading With Anchor](#)
- [Infinite Scroll](#)
- [Loading Button](#)
- [Multiple Selector](#)

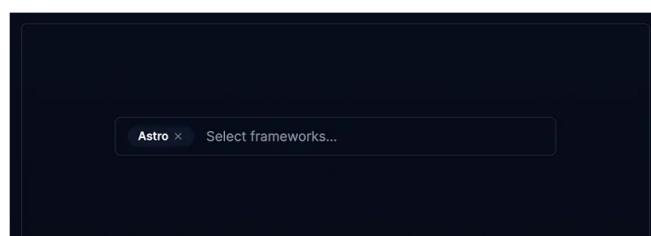

shadcn/ui expansions

shadcn/ui expansions collect lots of useful components which shadcn/ui does not have out of box. All the components are...

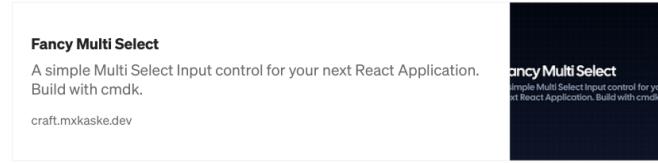

shadcnui-expansions.typeart.cc

...

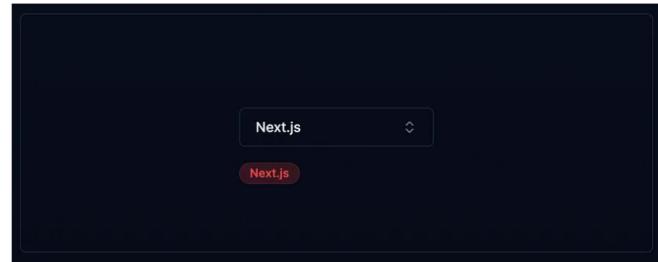

Fancy Multi Select

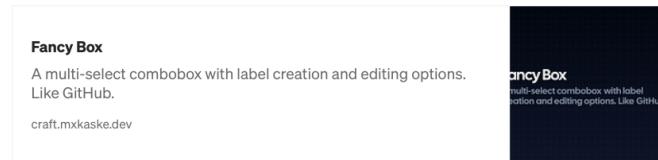

A Multi Select component inspired by [campsite.design](#)'s and [cal.com](#)'s settings forms.

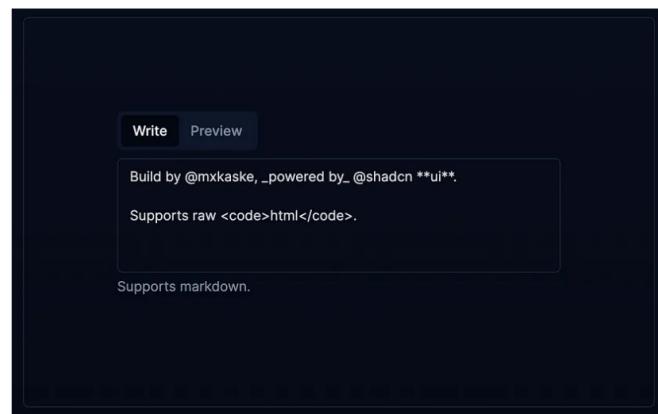

Fancy Box

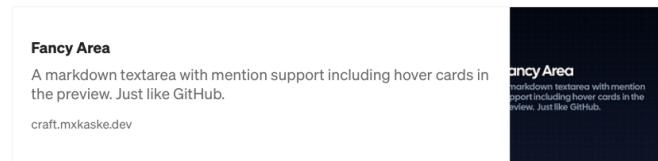

A Combobox component inspired by [GitHub](#)'s PR label selector.

Fancy Area

A Textarea component inspired by [GitHub](#)'s PR comment section.

shadcn-keyboard-shortcuts

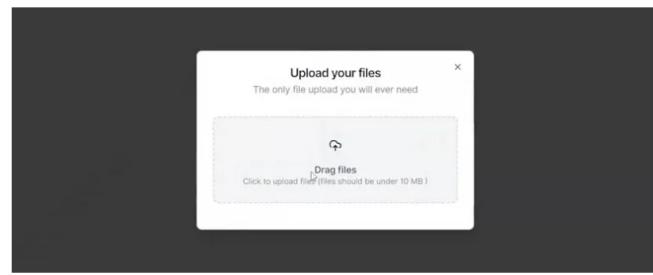

A keyboard shortcuts UI, with mac / PC variants.

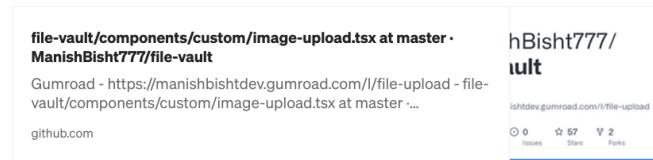

<https://stackblitz.com/edit/stackblitz-starters-dlsw2v>

...

Image upload

An image upload component with drag and drop, multiple uploads, and progress indicators.

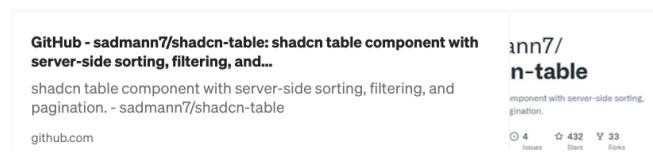

...

Emblor (previously shadcn-tag-input)

An input UI for tags. Renamed to emblor.

Introduction

A highly customizable, accessible, and fully-featured tag input component built with shadcn/ui.

emblor.jaleelbennett.com

Plate Rich Text Editor

Plate

The rich-text editor framework for React

50+ Plugins
Standard editor functionality is provided out of the box

Headless
Integrate your design system with the unstyled plugins

Components
Copy and customize our styled components as a starting point

Open Source
Free to use for personal and commercial projects

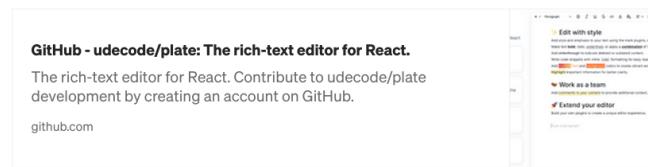

Edit with style
Add style and emphasis to your text using the mark plugins, which offers a variety of formatting options. Make text **bold**, italic, underlined, or apply a combination of these styles for a visually striking effect. Add strike-through to indicate deleted or outdated content. Write code snippets with inline code formatting for easy readability. Add multiple font and background colors to create vibrant and eye-catching text. Highlight important information for better clarity.

Work as a team
Add comments to your content to provide additional context, insights, or collaborate with others.

Extend your editor
Build your own plugins to create a unique editor experience.

Type a paragraph

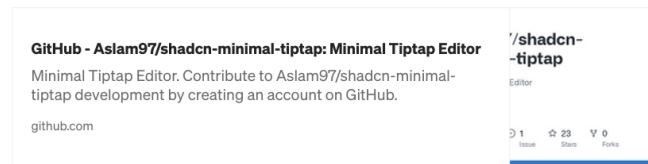

A rich text editor. Still very young, but keep an eye on it.

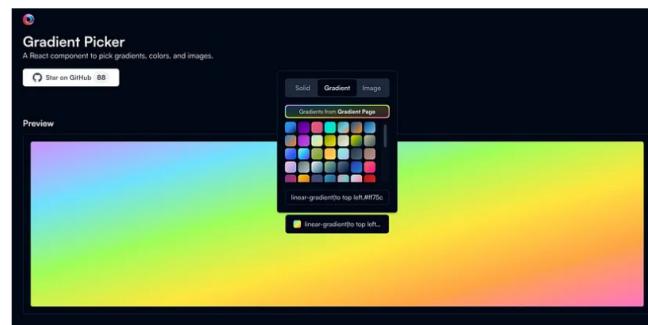

Minimal Tiptap Editor

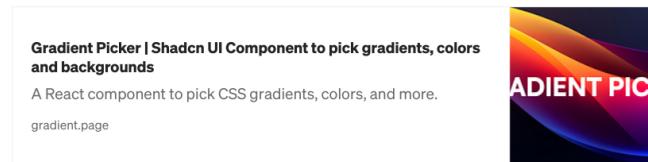

A minimal Tiptap Editor component built for [Shadcn](#). It provides a simple and clean editor for users to write and format text.

Gradient Picker

A gradient / color / background picker.

AutoForm

```
const formSchema = z.object({
```

```

username: z
    .string()
    .required_error: "Username is required."
)
).min(2, {
    message: "Username must be at least 2 characters."
),
password: z
    .string()
    .required_error: "Password is required."
)
).describe("Your secure password")
).min(8, {
    message: "Password must be at least 8 characters."
),
favouriteNumber: z.coerce
    .number()
    .invalid_type_error: "Favourite number must be a number."
)
).min(1, {
    message: "Favourite number must be at least 1."
)
).max(10, {
    message: "Favourite number must be at most 10."
)
).optional(),
acceptTerms: z
    .boolean()
    .default(false)
    .refine((value) => value, {
        message: "You must accept the terms and conditions.",
        path: ["acceptTerms"],
    })
),
birthday: z.date().optional(),
);

```

AutoForm Example

Automatically generate a form from a Zod schema.

Username *

Your secure password *

Favourite Number

Your favourite number between 1 and 10.

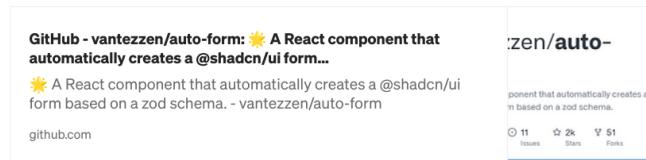

Accept Terms
I agree to the [terms and conditions](#).

Birthday

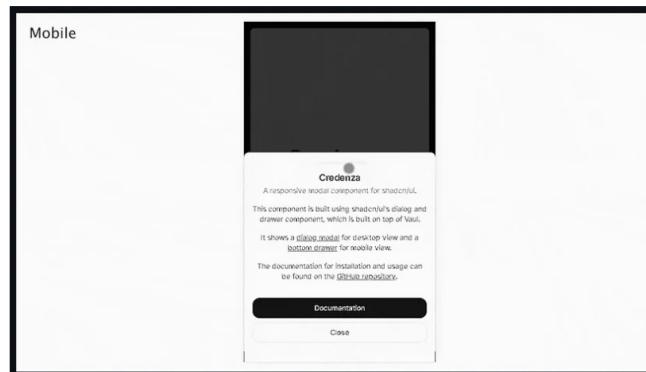

We need your birthday to send you a gift.

Send now

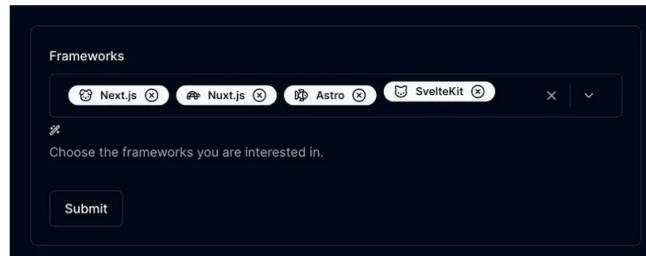

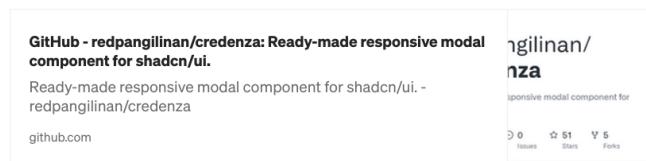

Create forms automatically from a zod schema.

Credenza Modal

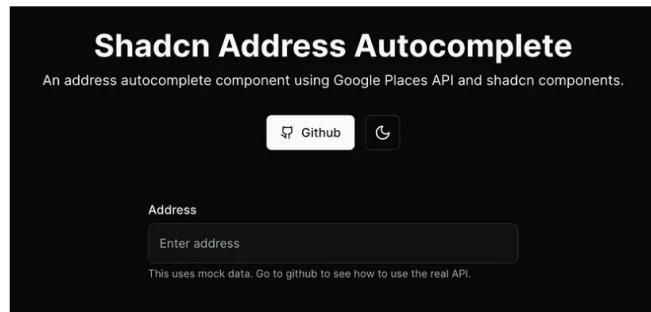

A responsive modal component for desktop and mobile.

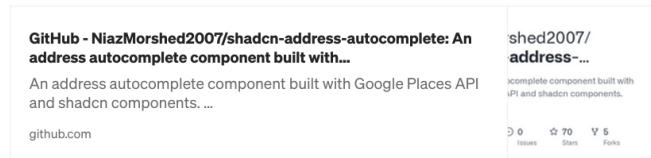

Another multi select component.

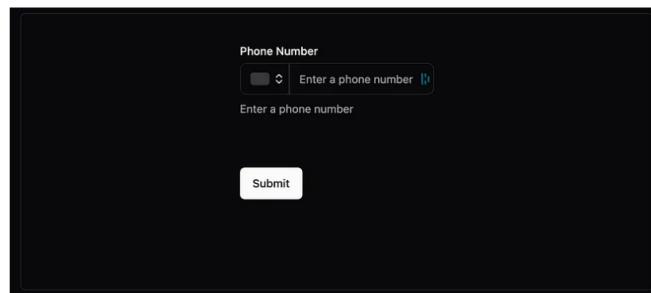

Shadcn Address Autocomplete

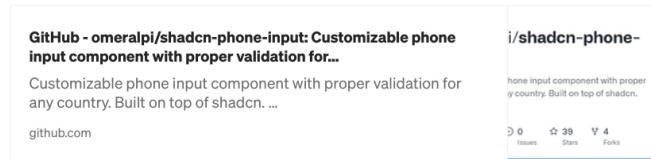

An address autocomplete component using Google Places API and shadcn components.

Phone Input

A Phone input component.

Enhanced Button

A version of the Button component with more variants.

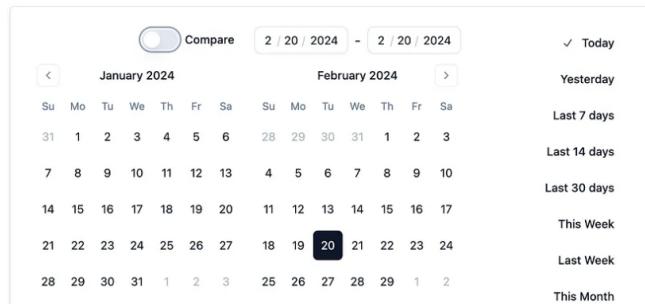

enhanced-button

An enhanced version of the shadcn-button component

enhanced-button.vercel.app

Calendar Date Picker Component in Next.js

Calendar Date Picker Component in Next.js

Prerequisites

Ensure you have a Next.js project set up. If not, create one:

```
npx create-next-app my-app --typescript  
cd my-app
```

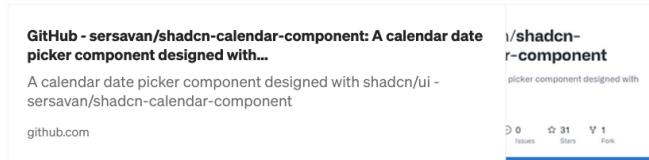

```

cd - my-app
Step 1: Install Required Dependencies
Install the necessary dependencies:
npm install date-fns date-fns-tz react-day-picker
npx shadcn-ui@latest init
npx shadcn-ui@latest add button calendar popover select

```

A calendar Date Picker Component made with Next.js.

Shadcn country region select

```

import { useState } from "react"
import CountrySelect from "@/components/ui/country-select";
import RegionSelect from "@/components/ui/region-select";

function CountryRegion() {
  const [countryCode, setCountryCode] = useState("");

  return (
    <div className="flex items-center flex-col w-full mt-20">
      <CountrySelect
        className="w-[180px]"
        onChange={(value) => setCountryCode(value)}
        priorityOptions={["US"]}
        placeholder="Country"
      >/</CountrySelect>
      <RegionSelect
        onChange={(value) => console.log(value)}
        className="w-[180px] mt-2"
        countryCode={countryCode}
      >/</RegionSelect>
    </div>
  )
}

```

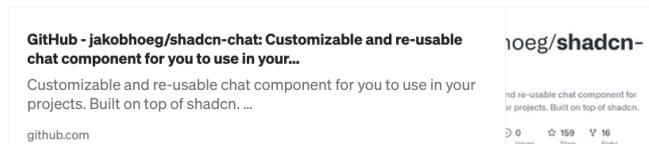

A country / region select input component.

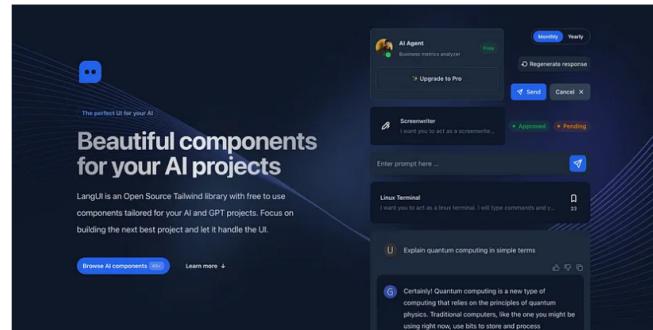

Chat

A ready to use Chat UI.

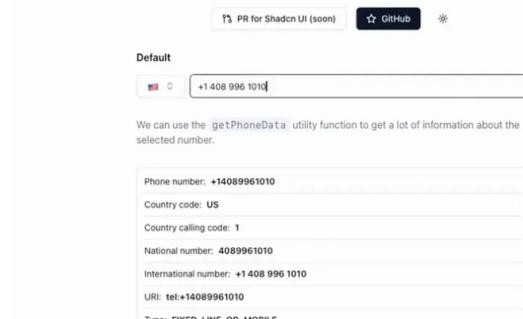

langui

A collection of UI components for AI projects.

A screenshot of the GitHub repository for langui. The README page shows a dark-themed UI component for AI projects. It includes sections for 'AI Agent', 'Screamer', and 'Linux Terminal'. Below the README is a screenshot of the actual UI application interface.

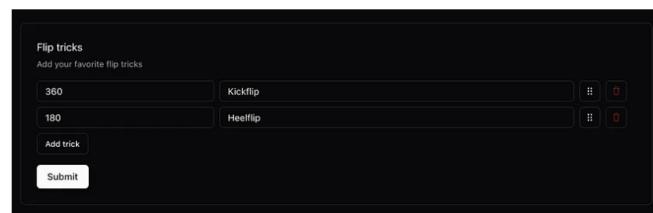

shadcn-phone-input

Another phone input.

A screenshot of the GitHub repository for shadcn-phone-input. It shows the repository details: 'GitHub - damianricobelli/shadcn-phone-input'. It also shows the repository statistics: 1 issue, 82 stars, and 4 forks.

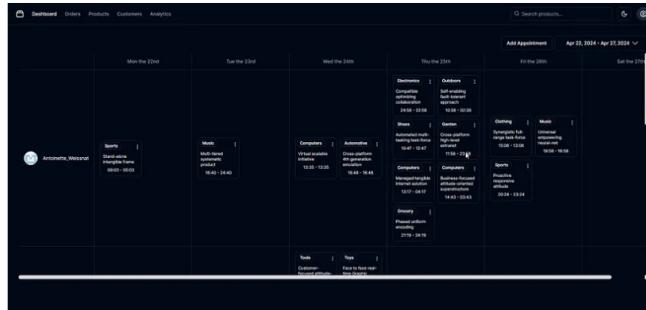

Sortable

A sortable reusable sortable component with shadcn/ui and dnd-kit.

Sortable
Sortable component built with dnd kit, shadcn/ui, and radix ui
sortable.sadmn.com

Planner

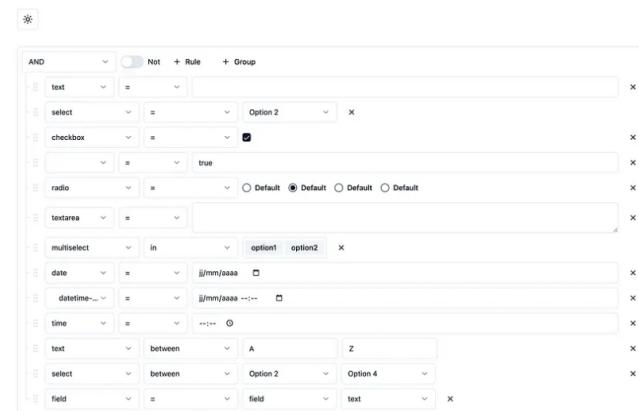

A scheduling component.

@react-querybuilder/shadcn-ui

Unofficial [react-querybuilder](#) components for [shadcn/ui](#).

I am the author of this one.

Customizer

Make it yours.
Hand-picked themes that you can copy and paste into your apps.

The dashboard features several cards: 'Total Revenue \$15,231.89 (+23% from last month)', 'Subscriptions +2350 (+502% from last month)', 'Team Members 100+ (Join your team members to collaborate.)', and 'Sofia Davis (Project Lead)'.

On the right, there's a color palette and theme editor with sliders for 'Mode' (Light/Dark), 'Radius' (0 to 10), and 'CSS Variables' for card, popover, primary, secondary, muted, and accent colors.

An open-source extension of [shadcn/ui](#) themes for customizing the theme.
